

Infor FMS SmartStream Assets delivers a state of the art asset management system that can help you gain maximum value from your fixed assets.

## INFOR FMS SMARTSTREAM ASSETS

### DO BUSINESS BETTER.

One of the biggest hidden costs in many organizations is managing fixed assets—it's also the most preventable. Between depreciation, repair, and replacement costs, not to mention financial and tax effects, the degree to which you effectively manage fixed assets can have a bigger bottom line impact than you may realize. If your organization has many locations or divisions, you may also be wasting money re-purchasing things you already have, because your records don't show that you have them.

### LEVERAGE EXPERIENCE.

Infor™ FMS SmartStream Assets is the result of over 40 years of real world experience garnered by our global team of industry experts. Members of our professional services organization go far beyond simply installing and implementing software systems; they know how to tailor each installation to meet the specific needs of your business because they know the specific demands of your industry. Infor's ongoing support and training help you feel confident that the solution you choose today will meet your needs for many years to come.

## GET BUSINESS SPECIFIC.

Truly accurate and comprehensive financial management means tracking durable assets with just as much care as you treat your cash, and monitoring depreciation as closely as you watch any other cost. Infor FMS SmartStream Assets gives you comprehensive control and detailed management information for capital assets across your organization. It allows you to deal with multiple companies and multiple divisions, while giving you full management details over both major and minor assets throughout their lifecycle. With our ongoing monitoring of regulatory changes, SmartStream Assets also delivers a comprehensive financial and tax solution that is fully compliant with current law.

The product also features reporting tools that improve internal decision making, as well as external reporting for financial, taxation, and regulatory purposes. You can customize reports to meet the most exacting needs of your organization, and modify them regularly to adapt to constantly changing situations and regulations.

With advanced depreciation management features, SmartStream Assets can give you an up-to-the minute, "big picture" view of the condition and value of your organization's entire collection of assets, which helps managers decide how, when, and where to invest replacement and upkeep money most effectively. And for organizations in which depreciation has a significant impact on tax returns and financial statements, SmartStream Assets can often pay for itself in reduced tax payments and more favorable credit treatment and trade discounts.

Where SmartStream Assets really shines is in its connection to the rest of the Infor FMS SmartStream suite of financial management tools. By fully integrating asset management with your general ledger, payables, and project accounting, you'll position your organization to make decisions based on the full range of variables that affect your business every day. Infor FMS SmartStream is built to support big picture strategy by streamlining the collection of the details that make big decisions work.

## SEE RESULTS NOW.

True cost control means managing more than immediate cash flow—you also need to recognize asset costs that will affect your bottom line for years or decades into the future. Infor FMS SmartStream Assets makes asset management an integral part of your financial management process. This approach can give you a more accurate view of your organization's financial well being, and allow you to make the smart decisions that eventually help you build a company that not only survives, but thrives for many years to come.

## THERE IS A BETTER WAY.

At Infor, we work with a core belief. We believe in the customer. We believe that the customer is seeking a better, more collaborative relationship with its business software provider. And a new breed of business software: created for evolution, not revolution. Software that's simple to buy, easy to deploy and convenient to manage. Our 70,000 customers in more than 100 countries stand with us. We look forward to your sharing in the results of our belief. There is a better way.
