

Infor FMS SmartStream Web Vendor SS

➔ Best-in-class enterprises cultivate highly effective relationships with their vendors. Infor FMS SmartStream Web Vendor SS leverages cutting edge, Microsoft.NET technology for quick, efficient vendor collaboration.

Do business better.

Efficient vendor partnerships can make or break your business. Just-in-time inventory strategies and overnight global delivery schedules require that the channels of communication with your vendors remain open and active every minute of every day. By taking advantage of a rich, web-enabled vendor self-service portal, you and your vendors will know where you stand as you progress toward your common goals, while saving time and money. What's more important, you and your trusted suppliers will be able to compete as a single team.

Leverage experience.

Infor™ brings decades of enterprise-level experience in financial management systems to thousands of the world's leading organizations. Our network of industry-specific experts can tailor and implement solutions that help you manage your company's greatest challenges and deliver best-in-class performance. Infor FMS SmartStreamWeb Vendor SS (self service) reduces cost of ownership by extending the value of your Infor FMS SmartStream Accounts Payable solution, giving your vendors flexible access to the information they need and improving productivity throughout your accounting department.

Get business specific.

Infor SmartStream Web Vendor SS is a web-deployed solution for your Accounts Payable (AP) module that is designed to improve communications with your vendors and save you time. Designed with Microsoft™ .NET technology, the program delivers rapid performance and a rich visual experience, making the task of finding data quick and efficient, while displaying the results with striking clarity. The application provides a secure, real-time method for your vendors to check their accounts payable information over the web. It provides an intelligent interface to your Infor FMS SmartStream Accounts Payable application and provides vendors details such as payment status, payment history, and invoice information.

Accessed through a standard browser, Infor FMS SmartStream Web Vendor SS consists of an online inquiry function that allows your suppliers to search their account information for:

- Vendor ID
- Invoice number
- Payment reference number
- Invoice date range
- Invoice amount range

Web Vendor SS reduces total cost of ownership by extending the value of your Infor FMS SmartStream Accounts Payable solution, giving your vendors flexible access to the information they need, and improving productivity throughout your accounting department. It communicates in real time with the SmartStream Accounts Payable application, so it can provide access to up-to-date information.

Web Vendor SS is GUI-driven and simple to use. It is easily installed and comes with full administration and configuration features that give you maximum control over security and access. This flexible, web-deployed solution allows you to push beyond the restrictions of working within specified business hours (i.e., vendors can access the information themselves anytime); enhances your business relationships; and gives your global partners an information window that allows them to see how well you do business.

See results now.

Infor FMS SmartStream Web Vendor SS integrates fully with the extensive range of financial management tools in the SmartStream suite. With a single sign-on to all related applications, the system delivers a fast, efficient way to access your entire financial management system. It's a powerful element in a comprehensive, end-to-end eProcurement strategy, particularly when combined with the workflow, funds control, and security features of Infor FMS SmartStream. Combined, they deliver powerful functionality within the convenient, familiar Internet environment that everyone knows so well. Keeping your vendors in the loop with Web Vendor SS can speed up your procurement operations and lower your total costs.

About Infor.

Infor acquires and develops functionally rich software backed by thousands of domain experts and then makes it better through continuous innovation, faster implementation options, global enablement, and flexible buying options. In a few short years, Infor has become one of the largest providers of business software in the world. For additional information, visit www.infor.com.
